"There are approximately a half dozen bandits, including their leader," Gatsby says. "Only the leader appears to be a Superlative of Villainous Character. She styles herself the Bandit Queen. Her abilities are, alas, unknown."

"She's struck what, seven times already?" Orchid asks. "Surely someone must have seen what she can do."

"I should instead say that reports of her abilities are varied," Gatsby corrects himself. "Some have said she is invisible. Others, that she moves with incredible speed. Still more claim that she throws lightning from the palms of her hands. The inconsistency in reports makes it difficult to advise you on a strategy."

You've been thinking most of the day about how to approach the problem. You've identified two likely strategies. Either one has its risks and advantages, but you've decided to...

- Find the bandit hideout and strike it directly; a simple approach leaves less room for error.
- Find the bandit hideout and strike it directly; it's the more honorable approach.
- Pose as wealthy travelers to draw out the bandits; better they attack us than innocent travelers.
- Pose as wealthy travelers to draw out the bandits; it's easier to find them if they come to us.

---

i love it its really good but i would wait for sale all tho im not complaining.....it performs well and the horns wrk well too. You can throw ninja stars, what more can you ask for?

11V10. This is a game all about momentum. It's a shame that, in the first ten minutes, the game seems to do everything it can to interrupt the momentum, and because of that, learning the controls. Tooltips pop up constantly telling you how to play the game after you've already started playing.

These interruptions cause a loss of perspective for what the character is doing, meaning you're even more likely to crash after one pops up, leading you to restart, and then have to go through that same tooltip again, leading to more crashes. The tooltips would be better if presented after crashing, or in small video tutorials before starting.

It's pretty, it's inexpensive, and it might be fun if the game allowed you to play.. I can give a buy recommendation for all dlc's, but they are not necessary at all costs.. it's fun, it's replayable, it has NG+ and NG++ and more, the jokes are fun, the story is great, the gameplay is solid, the classes are great, and all of them have their own thing they can do to make missions easier.

. Ok. Its nothing great, you cant even do anything else than watching around. (took me about 2 minutes to figure that out - controllers are not needed)

The whole experience including this 2 minutes of finding out how to do anything was aout 5 minutes.

I am used to Horror (both movies and games) and yes, i shaked a little bit 2 times. It uses cheap mechanisms, but honestly even if you expect them, it gets you in VR.

- buy that short experience for that 1Eur
- it shows what is possible within VR and Horrorgames
- dont expect a game or anything like that
- show it to people who experience VR the first time and scare the♥♥♥♥♥out of them:D:D. A fun game to play, whether you are playing alone or with a friend on the PC. Enjoyable cooking sim with a few nice twists. Looking forward to the future updates that add more content and challenge.

---

This route is highly detailed and set in a very beautiful part of Germany. The trains included are also nicely detailed and fun to drive. Overall, I would recommend this route.. This game is really scary you should buy it  
See the video below

[\u0627\u0644\u0644\u0639\u0628\u0647 \u0645\u0646 \u062c\u062f \u0645\u062c\u0646\u0648\u0646\u0647 \u0627\u0644\u0644\u064a \u0646\u0646\u062f\u0628 \u0627\u0644\u0631\u0639\u0628 \u0646\u0647\u0627. Good game, great if you've seen the Bud Spencer & Terence Hill movies. I hope they will make a follow up on this game with a better combat system \(more moves and double team moves\) and less of the talking during the missions. The talking really takes away from the flow of the game in my opinion.](#)

[Would recommend if you like fighting games.. Worst Case Z is one of the few games that describes its gameplay experience in the title . . . the worst case. This game has terrible level design, impossible objectives, unrealistic gameplay elements, bad voice acting, and more than unfitting cutscenes. A game about radioactive zombies shouldn't have human-spider hybrids and definitely shouldn't start off with the main character doing a clunky rendition of the outdated \(even at release\) Gangnam Style. This horror game tries so hard to be the ultimate campy, off-the-wall horror experience but fails. The quirky jokes aren't relevant and the quality of its scares are questionable. This game \\*could\\* have had potential. In fact, some of the more well-designed enemies and objects feel out-of-place. Worst Case Z didn't know what it wanted to be and may not have had the financial binds to do so, which, in this case, IS the worst case.. This game is quite a pleasant combination of reward, panic, risk, cooperation, and hilarity. While it drains the VR player's energy quite fast, it is nevertheless a really fun game.](#)

[The coop element is well done, but not necessary. A lonely player can have the same experience with AI waiters, albeit it is slightly harder because the AI is not efficient in terms of serving customers. For instance, they would rather take 2 orders, and wait for both to be finished before serving rather than serving one at a time.](#)

[Playing with a friend is lots of fun, and there is lots of shouting and confusion involved.](#)

[The whole process of cooking the food is also fun on its own, and can be very frantic if there is just one mistake with an ingredient.](#)

[At some points the game might feel a bit tedious, when things get too complicated.. Before buying the game I ran across some reviews indicating that this is a 4X strategy game with a high level of complexity. That's fine for me, after all that is what is intended to be for serious strategy 4X games.](#)

[But complexity needs the appropriate tools, interface and AI to work fine. Unfortunately this game lacks all of them. Yes it is complex, but it turns out to become very chaotic in the end.](#)

[So you probably get fed up and let everything be managed by the AI. The AI governors will actually do a good job for you and the only thing left to do is designing ships \(which is actually a cool part of the game\), building them into thousands with out any limitations and penalties and sending them to massacres under a very aggressive AI which doesn't give you much choices than to go into meaningless chaotic wars.](#)

[Just curious, doesn't a ship have any maintenance expenses? And build by the thousands? It wouldn't be a problem managing such a large numbers of units, but you don't have the appropriate tools to do that or at least the ones provided are very poor.](#)

[Diplomacy is very poor, management of empire also poor and with out any perceptive, interface controllers and functions a bit strange and difficult to adjust even for experienced strategy gamers. The game also lacks a sense of personality, rather mediocre.](#)

[So finally in the end you have got this enormous in numbers ships and just send them to battles, one after another, contentiously... ba ba doom boom... boring... still for some this might be enough and very entertaining.](#)

[On the other hand, graphs and layout are quite good, simple and minimal which in my aesthetic \(and functionality\) perspective is good. Music is also one of the best encountered in this genre of games, and the concept is fine but just stuck in the level of intentions.](#)
